

Read this information first

You should file Schedule CR if

- you were either a resident or a part-year resident of Illinois during the tax year; and
• you paid income tax to another state on income you earned while you were an Illinois resident; and
• the income subject to the other state's tax is included in your Illinois base income; and
• you did not deduct the income tax paid to the other state when you figured your federal adjusted gross income as shown on your Illinois tax return.

You should not file this schedule if

- you were a nonresident of Illinois during the entire tax year; or
• you did not pay income tax to Illinois and another state.
For purposes of this schedule, "state" means any state of the United States, the District of Columbia, the Commonwealth of Puerto Rico, any territory or possession of the United States, or political subdivision of any of these (e.g., county, city, local). The term "state" does not refer to any foreign country.

Note If you earned income in Iowa, Kentucky, Michigan, or Wisconsin, you may be covered by a reciprocal agreement. This agreement applies only to income from wages, salaries, tips, and other employee compensation. See the Schedule CR Instructions.

Step 1: Provide the following information

Your name as shown on your Form IL-1040

Your Social Security number

Step 2: Figure the Illinois and non-Illinois portions of your federal adjusted gross income

Write the amounts in Column A exactly as reported on

- your federal return if you were an Illinois resident, or
• the equivalent line of your Schedule NR, Column B if you were a part-year resident.

Read the instructions before completing this step.

# Schedule CR Instructions

## General Information

### ? What is the purpose of Schedule CR?

Schedule CR, Credit for Tax Paid to Other States, allows you to take a credit for income taxes you paid to other states on income you received while a resident of Illinois. You are allowed this credit **only** if you filed a required tax return with the other state. You must use information from the tax return you filed with the other state to complete Schedule CR.

A **part-year resident** may only take a credit on income earned while a resident of Illinois.

A **nonresident** may **not** take a credit on Illinois Schedule CR.

### ? What taxes qualify for the credit?

Taxes that qualify for the credit are income taxes you paid to another state of the United States, the District of Columbia, the Commonwealth of Puerto Rico, or any territory or possession of the United States, or to a political subdivision (e.g., county, city, local) of one of these jurisdictions. No credit is allowed for taxes paid to the federal government or to foreign countries or to their political subdivisions.

To qualify for this credit, a tax must be deductible as state and local income taxes paid on your federal Schedule A, Itemized Deductions, whether or not you actually claimed the deduction. An alternative minimum tax measured by income may qualify. See Publication 111, Illinois Schedule CR for Individuals, for details.

**Note** No credit is allowed for interest or penalties imposed on you, even in connection with an income tax. You may claim the credit for income taxes paid on your behalf (e.g., by withholding or with a composite return), but only if you are the person legally liable for the tax (i.e., if you would be required to pay the tax if it had not been paid on your behalf).

### ? What if I earn income in Iowa, Kentucky, Michigan, or Wisconsin?

If you earned wages, salaries, tips, or other employee compensation from an employer in Iowa, Kentucky, Michigan, or Wisconsin while you were a resident of Illinois, you are covered by a reciprocal agreement between that state and Illinois and are not taxed by that state on your compensation. However, you may be taxed on other income.

If your employer withheld tax or you paid tax to these states on your compensation, you must claim a refund from that state. You **may not** claim a credit on Schedule CR for that tax. You must file the appropriate forms with that state to receive a refund of tax withheld in error.

The reciprocal agreements do not prohibit subdivisions of these states from imposing a tax on your compensation. For example, if you were subject to tax by a city in Kentucky while you were an Illinois resident, you may claim a credit for that local tax.

In addition, because of differences in state laws, you may be considered a resident by one of these states and required to pay their income taxes, even though you are an Illinois resident under Illinois law. In that case, you may claim a credit for the tax paid.

### ? Where can I find specific formulas to figure tax paid to other states?

When you figure credit for tax paid to other states, you must consider that tax from the other states' returns may not be calculated in the same manner as on your Illinois return. For a list of formulas that identify the tax forms, line numbers, additions, and subtractions that you must use to compute the other states' tax for Schedule CR, see Publication 111.

## Specific Instructions

- entirely from Illinois sources, write zero.
- entirely outside Illinois, write the amount from Column A.
- from both inside and outside Illinois, complete the IAF Worksheet on Page 8 to figure the non-Illinois portion of the deduction, and include the amount from Line 5 of the worksheet.

If the deduction was passed through to you by a partnership or S corporation, complete the Partnership and S Corporation Worksheet on Page 8 to figure the amount to include.

If your domestic production activities deduction is derived from more than one source, divide the deduction among the sources in proportion to your domestic production activities income from each source and apportion the amount from each source separately.

**Note** Do not complete Step 5 if you lived in Illinois the entire tax year.

### Step 6: Figure your credit

**Line 50** – If you are claiming a credit for tax paid to Iowa, Kentucky, Michigan, or Wisconsin, check the box for the appropriate state. See “What if I earned income in Iowa, Kentucky, Michigan, or Wisconsin?” under “General Information” for more details.

**Line 51** – Write the total tax you paid to all other states minus all credits allowed, except credits for payments you actually made to the other states or payments made on your behalf.

For example, you must reduce the amount of tax paid to another state by any credit allowed by that state for taxes you paid to Illinois. However, you would not subtract a credit on your return for an overpayment from a prior year that you applied to this year’s estimated payments in the other state, for income tax withheld by your employer, or from payments you received from a partnership. If you purchased a transferable credit, the amount you paid for the credit is treated as a payment of tax.

**Note** For a list of formulas that identify the tax forms, line numbers, additions, and subtractions that you must use to compute the other states’ tax, see Publication 111.

**Lines 52 through 55** – Follow the instructions on the form.
